DK Ambulance Service

Who are we?

DK Ambulance Service started as a company in 2008 with the acquisition of a second-hand VW T4 ambulance from Copenhagen's fire service. Since then, DK Ambulance Service has been recognised as a reliable, trustworthy and honest business partner in the prehospital service area.

In 2014, we became the first and only small privately-owned ambulance service provider to be approved to educate ambulance students and have therefore contributed to educating highly-skilled paramedics.

What do we have?

Today, the **DK Ambulance Service** fleet consists of 7 ambulances, including 2 brand new Mercedes Sprinter 319 CDI and 1 new VW Crafter. In addition, we have 1 Mercedes Sprinter 316 CDI and 2 Volvo/Nilsson XC 70 and XC 90, and 1 Mercedes Sprinter 519 CDI Special ambulance with a lift for stretchers and incubator transportation trolleys.

All our ambulances are built and approved according to the DS/EN 1789 standard.

Our equipment includes

- Zoll Propaq X series and Lifepak 15 monitor and defibrillator.
- Hamilton T1 and Medumat Emergency & transport ventilator.
- B.Braun infusion pumps etc.

Our areas of expertise

DK Ambulance Service carries out tasks for many of the large insurance companies in Denmark and abroad, including transporting patients to Denmark or to the rest of Scandinavia and Europe. We also perform tasks for the public sector, local authorities and regions that need our services. In addition, we provide many services to private individuals who are not covered by the region's ambulances and transportation of patients.

Furthermore, DK Ambulance Service has a strong partnership with many different air ambulance companies worldwide in connection with medical repatriation flights to and from Denmark.

DK Ambulance Service is subject to the Danish Patient Safety Authority and operates in accordance with the Executive Order on ambulances and training of ambulance staff.
